The screenshot below shows the working of the web app befor and after file update

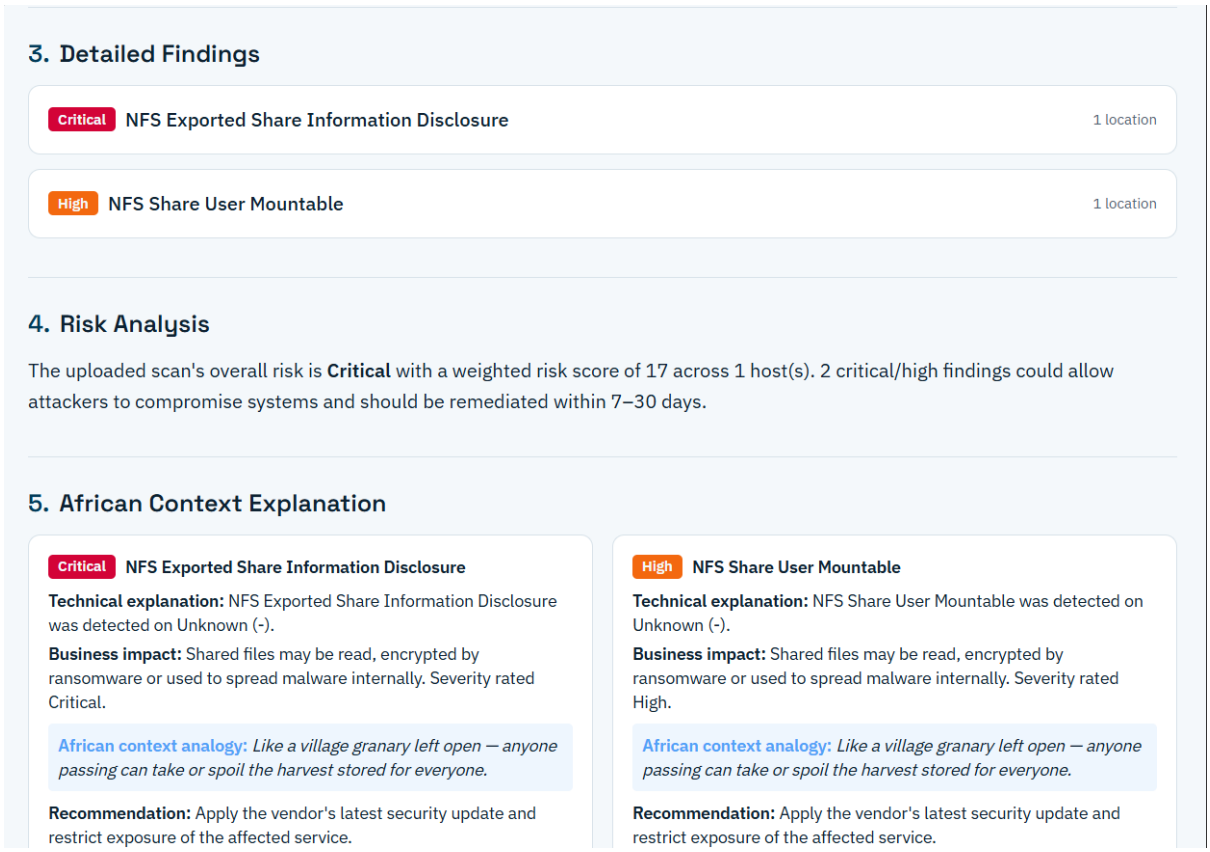

Web Interface screenshot

After Uploading CSV File

Shows the findings

6. Recommendations

1. Critical **NFS Exported Share Information Disclosure** (1 location) — Review vendor guidance and apply the latest security update.
2. High **NFS Share User Mountable** (1 location) — Review vendor guidance and apply the latest security update.

7. Conclusion

Addressing the 2 critical and high severity issues first will remove the largest share of risk (score 17). Re-scan after remediation to confirm fixes.
